## The Agile Manifesto The Mission Statement

We Value:

over

Individuals and Interactions

Process and Tools

Working Software

Comprehensive Documentation

Customer Collaboration

Contract Negotiation

Responding to Change

Following a Plan

*That is, while there is value in the items on the right, we value the items on the left more.*

## 12 Principles of The Agile Manifesto

- |  |  |
|--|--|
| <b>1</b> Our highest priority is to satisfy the customer through early and <b>continuous delivery of valuable software</b> .                       | <b>7</b> Working software is the <b>primary measure of progress</b> .  |
| <b>2</b> <b>Welcome changing requirements</b> , even late in development. Agile processes harness change for the customer's competitive advantage. | <b>8</b> Agile processes promote <b>sustainable development</b> . The sponsors, developers, and users should be able to maintain a constant pace indefinitely. |
| <b>3</b> <b>Deliver working software frequently</b> , from a couple of weeks to a couple of months, with a preference to the shorter time scale.   | <b>9</b> Continuous attention to <b>technical excellence</b> and good design enhances quality.   |
| <b>4</b> <b>Business people and developers must work together daily</b> throughout the project.  | <b>10</b> <b>Simplicity</b> – the art of <b>maximizing</b> the amount of <b>work not done</b> – is essential.  |
| <b>5</b> <b>Build project around motivated individuals</b> . Give them the environment and support they need, and trust them to get the job done.  | <b>11</b> The best architectures, requirements, and designs emerge from <b>self-organizing teams</b> .   |
| <b>6</b> The most efficient and effective method of conveying information to and within a team is <b>face-to-face conversation</b> .               | <b>12</b> At regular intervals, the <b>team reflects</b> on how to become more effective, then tunes and <b>adjusts its behavior accordingly</b> .             |

G2 Development Project > G2 Backlog

G2 Backlog

List of G2 product features

ID	Story	Value	Planned Release	Status	Details	Team	Dev No
2162	Statement of Work (SOW)	(1) High	Release 1.10 - Apr 15, 2010	QA - Pass	SOW will be identified as DRAFT if status is In Progress, Submitted, or Rejected. SOW will not be identified as DRAFT once status is Approved.  This was partially released in 1.9. There is an outstanding enhancement in Issues number 1007.  I think we should just close issue 1007 since SPA version and SOW version are really two different numbers.	ORNL	
2180	Add Rad Projects Info to Building Information Page	(1) High	Release 1.10 - Apr 15, 2010	QA - Pass	Nuclear project information was added to the Building Information page in Release 1.9. Rad project information needs to be added so the user can see what Rad projects the building is tied to.	ORNL	
2181	Improve Performance of Security Upgrades	(1) High	Release 1.10 - Apr 15, 2010	QA - Pass	The Security Upgrades takes way too long to save. Modify the code to get increased performance where possible.  I've modified the code so after the initial save, the subsequent saves should be a little faster.	ORNL	
2182	Update IDO Questionnaire	(1) High	Release 1.10 - Apr 15, 2010	QA - Pass	The questions and format for the IDO have been changed. Need to modify website to accommodate new requirements. See attached files.  If IDO can't get updated in this release then remove the requirements for IDO to be complete in order to submit SPA.  After further clarification, it turns out that HQ does not want an incomplete IDO to keep the user from submitting the SPA. The user needs to be able to submit the SPA regardless of whether the IDO is complete or not.	ORNL	
2186	SPA SOW Updates	(1) High	Release 1.10 - Apr 15, 2010	QA - Pass	See attached document. There needs to be two different SOW reports, one for PNWL and one for Sandia (SNL). Each will have logos and language specific to the particular lab. We will know which report to display based on a new field (Assessment Team) on the SPA to allow the user to pick which team is doing the assessment (NE, NW, SE, or SW). The field will initially be selected based on the geographic region of the state, but can be overridden by the team because the NW team will be doing assessments in the NE region.	ORNL	
2189	Add New Role for Inventory Admin	(1) High	Release 1.10 - Apr 15, 2010	QA - Pass	A new role is needed for HQ administration of the Inventory and SPA. Currently, this role would belong to Matt Samples who needs access to all Inventory and SPA data. Currently, we have to assign him Inventory Edit and SPA Edit for every single country - all 193 of them.	ORNL	
2191	Region Team Lead on Off	(1) High	Release 1.10 - Apr 15, 2010	QA - Pass	The users with RTL and RO roles need to implicitly receive the Inventory Edit and SPA Edit permissions. Currently, these roles have no permissions.	ORNL	

					Description	Comments	User Group	GTRI Priority	Risk Level (CS)	Notes
1.7	Admin	Project Member Role	3.3	June 2012	Identify everyone at a lab involved in a project so that these people could receive certain notifications. Lab finance people could assign this role. These people might need permission to unsubscribe to email notifications (i.e., FinPlan approve notification)		All	C		wanted this so that lab folks can receive financial notification emails (and maybe others). What are all the notifications that the role would qualify for? Could the individual opt in/out or would the lab finance person do this for their staff to control who would even have possibility of getting the email
1.8	Admin	Cost Forecast Module	3.3	June 2012	Create a cost forecast module that will allow labs to forecast costs for the FY.	to work with on UI	All	B		to review mockup.
1.13	Admin	Notification Option	3.2	May 2012	Give users option to choose between standard emails vs. calendar invites for FinPlan email notifications.	and functionality	All	B		
1.14	Admin	Drop Down List Changes	3.1	Apr 2012	Add a "check all" box to the Person admin access screens, including PM/PMO, Inventory/SPA, and Country Officer.  Change drop down lists to pick lists so multiple selections can be made at the same time.		Project Controls	A		
1.17	Admin	Lab POC Role	3.3	June 2012	New project based role: would allow multiple people per role per project; lab budget POC would have permissions to manage this role for their lab.	would not fit current person admin model; would require new UI; maybe preference screen similar to PMO management	Lab	C	Low	
1.19	Admin	Spend Plan Admin Module	3.2	May 2012	New ability for Project Controls to "refresh" spend plans at the beginning of each fiscal year.		Lab	A	Low	
1.20	Admin	Sync Project Admin and Planning	3.2	May 2012	When planning module is open, changes made in the project admin area are not synced with the planning area. Need to develop mechanism to facilitate this process.		Project Controls	A	Low	
1.21	Admin	PM Access control	3.2	May 2012	Provide ability for PM/COs to add SPA/Inventory privileges to users.		PM/COs	A		
1.22	Admin	Project Templates	3.1	Apr 2012	Give project controls ability to add LOE template type to any project.		Project Controls	A		
1.23	Admin	User Bug Submission	3.2	May 2012	Give project controls ability to add LOE template type to any project.		Project Controls	A		
2										
2.2	BCRs	Explanation History	3.2	May 2012	Add ability to view history of explanations		PM/COs	B	High	
2.6	BCRs	Approval/Rejection Comments	3.2	May 2012	Ability for approvers to write comments, which will be included in the approval/rejection notification email.		AADA/COs	B-		
2.8	BCRs	Redesign BCR Screen	3.2	Apr 2012	Combine the Schedule and Scope tabs on the BCR screen and organize tasks/buildings by Site. Combine task schedule, task metric, remove task, and cancel task functionality into a single popup; adding scope and outyear funding would remain separate tabs.	User request. When users make a change on the scope tab the change isn't reflected on the schedule tab, and on long, complex BCRs this can become confusing. It would be easier if the Schedule and Scope tabs were combined so those changes are all on one screen.	PM/COs	B	Low

## Define & use a process for instituting change

Define a  
common goal

Provide a  
conductive  
environment  
for change

Include team  
members

Provide  
opportunities  
for feedback  
(and don't  
judge)

Be aware of  
the need for  
iterations and  
refinements  
of the process

Live the  
Lessons  
Learned  
process

Slide 35

## How We Defined Our Process

Sensible  
adherence  
to SEM  
while  
maintaining  
our Agile  
roots

Engage  
leadership

Involve the  
entire team

Ask, ask,  
ask,...  
and then  
listen

Iterate with  
intention  
Update the  
process

Use  
retrospectives  
Practice  
engaged  
listening

## The Outcome

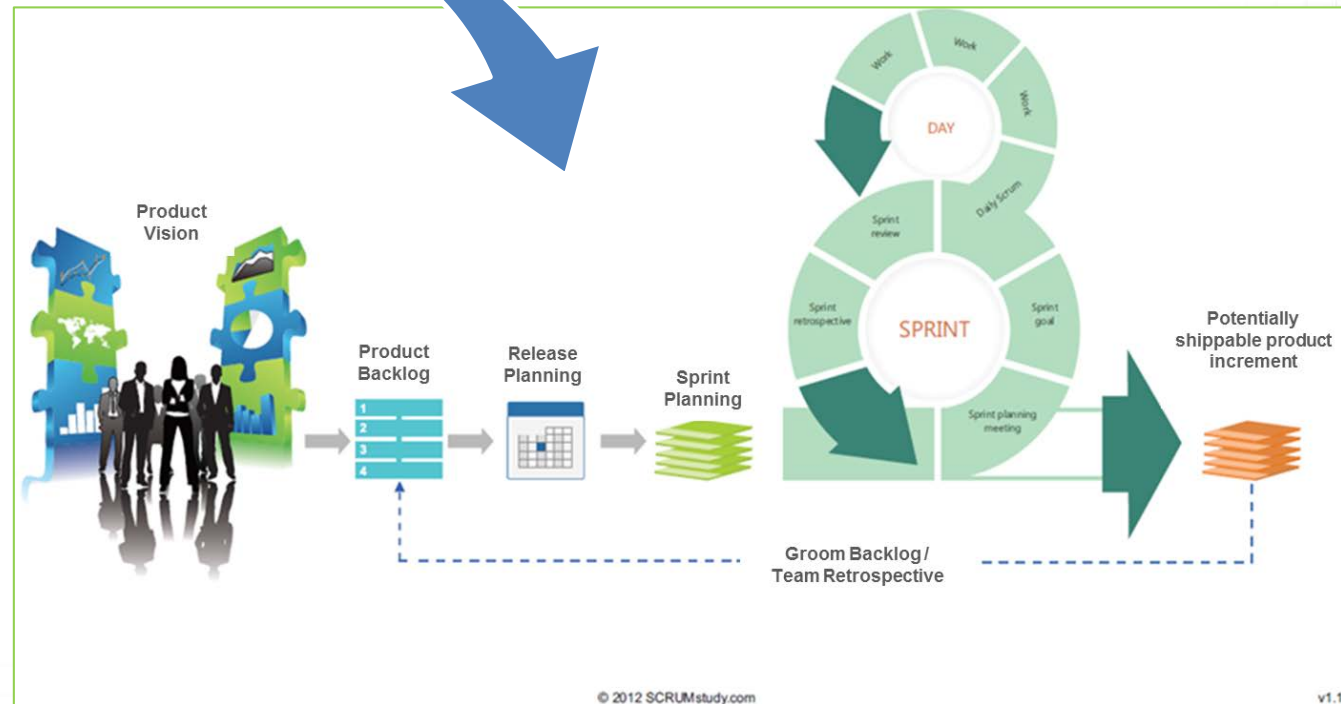

### Annual Review

1. Project Plan
2. System Requirements Specification
3. Configuration Management and Software Change Control Plan
4. Software Quality Assurance Plan
5. Cyber Security Plan
6. Deployment Guide
7. Nondisclosure Agreement

### Ongoing

1. Backlog
2. Coding Standards
3. Functional System Design Documents
4. As-developed Architecture
5. Organization Chart
6. Setup and Configuration Processes
7. Release-based Test Plans
8. Online Help/User's Guide
9. Release Notes

## U.S. Department of Energy Washington, D.C.

ORDER

DOE O 415.1

Approved: 12-3-2012

### SUBJECT: INFORMATION TECHNOLOGY PROJECT MANAGEMENT

1. PURPOSE. To provide the Department of Energy (DOE) Elements, including the National Nuclear Security Administration (NNSA), with Information Technology (IT) Project Management guidance for the acquisition and management of IT projects and initiatives. Common IT Project Management requirements will ensure that IT projects are delivered within the original performance baseline, cost, and schedule and fully meet Mission performance, safety, safeguards, and security standards in alignment with section 5123 of Public Law (P.L.) 104-106, *Performance and Results Based Management*.
  - a. To responsibly manage IT projects that will improve the efficiency and effectiveness of DOE operations and, as appropriate, the delivery of services to the public;
  - b. To establish communications within the Office of the Chief Information Officer (OCIO) and across all DOE Elements for DOE Enterprise-wide IT projects;
  - c. To align decision making within the OCIO and across all DOE Elements for Department-wide IT projects; and
  - d. To reduce duplication of effort and the Total Cost of Ownership (TCO) for DOE IT projects.
2. CANCELLATION. DOE Guide (G) 200.1-1, *Software Engineering Methodology Guide*, dated 5-21-97.

## U.S. Department of Energy Washington, D.C.

ORDER

DOE O 415.1

Approved: 12-3-2012

SUBJECT: INFORMATION TECHNOLOGY PROJECT MANAGEMENT

*choose and  
implement one or  
more of these...*

Recommended in the Order	Applies To
ANSI/ASME NQA-1	Does not apply to NS projects - organizational certification program for those companies supplying items or services that provide a safety function for nuclear facilities.
ISO 9000 Series	For organizational certification, not projects. At ORNL, SBMS is the ISO 9001:2008 certified Quality Management System (QMS), the major component of 9001:2008 certification. Currently, no ITPM-specific guidance is included in SBMS.
IAEA 50-G-Q Safety Guide Series	Does not apply to NS projects - this series provides quality assurance information and management pertaining to safety in nuclear power plants and other nuclear installations.
<b>PMBOK</b>	From the PMBOK: "...provides guidelines for managing individual projects and defines project management related concepts. It also describes the project management life cycle and its related processes, as well as the project life cycle. The PMBOK contains the globally recognized standard and guide for the project management profession (found in Annex A1)."
